

Call for Papers

CMS 2015 - 6th Workshop on Conceptual Modelling of Services

19-22 October 2015, Stockholm, Sweden

The 6th International Workshop on Conceptual Modelling of Services (CMS 2015) co-located with the 34th International Conference on Conceptual Modeling (ER 2015) will be held in Stockholm Sweden October 19 – 22, 2015.

The CMS workshop aims to bring together researchers in the areas of services computing, services science, business process modelling, and conceptual modelling. The emphasis of this workshop is on the intersection of the rather new, fast growing services computing and services science paradigms with the well-established conceptual modelling area.

Topics of Interest

Typical topics of research papers include:

- Conceptual models for integrated design and delivery of value bundles (i.e. services and physical goods);
- Formal methods for services computing / cloud computing / services science;
- Foundation of business process modelling, integration and management;
- Modelling languages / techniques for services;
- Modelling of semantic services;
- Modelling support for service integration – within a single domain; across multiple domains; with legacy applications; etc.
- Personalisation of services;
- Quality of service modelling;
- Reference models for service-oriented systems;
- Semantics of service-oriented systems;
- Service composition planning and verification;
- Service computing process modelling, transformation and integration;

- Service development process modelling;
- Service ontologies and ontology alignment;
- Cloud SLAs, business models and pricing policies;
- User interfaces for assisted service modelling; and
- Work-flow modelling.

Submission Guideline

Papers must be in English, formatted in LNCS proceeding style and submitted as pdf-files. Submitted papers must be original and not submitted or accepted for publication in any other workshop, conference, or journal. Please follow the instructions at <http://www.springer.de/comp/lncs/authors.html> to prepare your papers. The maximum length of workshop papers is set to **11 pages** in the LNCS proceeding style.

Camera ready submissions must contain the final version of a paper in **PDF** format, **LaTeX/Word sources** and a filled and signed Springer **copyright transfer form**.

At least one author of each accepted paper is required to attend the workshop and present the paper. Submissions to CMS 2015 will only be accepted electronically via the EasyChair conference submission system: <https://easychair.org/conferences/?conf=cms2015>

The workshop proceedings shall be published as a Springer LNCS volume.

Important Dates

Submission of full paper: 19 April 2015

Notification of acceptance: 1 June 2015

Submission of camera-ready final version (**strict deadline**): **17 June 2015**

Workshop: between October 19 – 22, 2015 (hosted by the Department of Computer and Systems Sciences (DSV) of Stockholm University, Sweden)

Workshop Chairs

Dr. Károly Bósa Christian-Doppler Laboratory for Client-Centric Cloud Computing,
Johannes Kepler University Linz, Austria

Dr. Thomas Ziebermayr Software Competence Center Hagenberg GmbH, Austria

Programme Committee

To be announced.
